# **1 Part 1: Annual Budget**

## **1.1 Mayor's Report**

The Mayor's budget speech for the 2024/25 Medium Term Budget Revenue and Expenditure Framework (MTREF) will be presented by the Executive Mayor, Councilor Dr. R. Richards during the council meeting.

## **1.2 Legislative Background:**

Chapter 4, Section 16 of the Municipal Finance Management Act states that:

- (1) The council of a municipality must for each financial year approve an annual budget for the municipality before the start of that financial year.
- (2) In order for a municipality to comply with subsection (1), the mayor of the municipality must table the annual budget at a council meeting at least 90 days before the start of the budget year.

Furthermore, Chapter 4, section 17 (1) of the Municipal Finance Management Act states that:

An annual budget of a municipality must be a schedule in the prescribed format-

- (a) setting out realistically anticipated revenue for the budget year from each revenue source;
- (b) appropriating expenditure for the budget year under the different votes of the municipality;
- (c) setting out indicative revenue per revenue source and projected expenditure by vote for the two financial years following the budget year;
- (d) setting out-
  - (i) estimated revenue and expenditure by vote for current year; and
  - (ii) actual revenue and expenditure by vote for the financial year preceding the current year; and
- (e) A statement containing any other information required by section 215 (3) of the Constitution or as may be prescribed.

The Budget has been drafted in accordance with the requirements of MFMA Circular No 126 , MFMA Circular No 128 i.e. Municipal Budget Circular for the 2024/25 MTREF (08 March 2024) , the Division of Revenue Bill B4 of 2024 and the Provincial Gazette Extraordinary 8892 dated 7 March 2024.

### **1.3 Council Resolutions**

1. Council approves for public consultation the draft annual budget Report APPENDIX A.
2. Council approves for public consultation the draft annual budget tables as prescribed by the Budgeting and Reporting Regulations, as set out in APPENDIX B.
3. Council approves for public consultation the draft annual budget supporting tables as prescribed by the Budgeting and Reporting Regulations, as set out in APPENDIX C.
4. Council approves the Quality Certificate signed by the Accounting Officer, as set out in APPENDIX D.
5. Council approves for consultation the revised budget related policies, as set out in APPENDIX E.
6. Council approves for public consultation the property rates and charges on properties, tariffs, tariff structures and service charges for water, electricity, refuse, sewerage and other municipal services, as set out in APPENDIX F.
7. That Council approves the Draft Service Level Standards set out in APPENDIX H.
8. That council approves the Procurement Plans as set out in APPENDIX I.
9. The Draft Budget for the period 2024/2025 is made available to the public for comment.

## 1.4 Executive Summary

### 1. The South African economy and inflation targets:

South Africa has reached a stage where municipalities need to play a pivotal role in igniting the economy of the country. There is a need for a concerted effort to implement initiatives that will attract investments which will stimulate the economy.

The weak projection for 2024 mainly reflects lower household consumption expenditure due to higher inflation and interest rates, and lower net exports. Global growth is forecast at 3.1 percent in 2024. Power cuts are expected to continue for the remainder of this year and to gradually ease in 2024/2025. Headline inflation is projected to moderate from 6 per cent in 2023 to 4.9 per cent in 2024 and 4.6 per cent in 2025 and 2026 as food and fuel inflation continue to decline.

In the context of weaker global growth and risks to the domestic outlook, government is working to position the economy for sustained growth and resilience to shocks. The extreme pressure on National Treasury also resulted in Government implementing strict cost containment regulations within government spheres and a severe reduction of grant funding allocated to Provincial Government and the local municipalities.

**In a nutshell the essence is that Cederberg local municipality will receive less from government and therefore the municipality must ensure that operations and revenue created must be cost effective and sustainable to the municipality.**

Accounting Officers and their Chief Financial Officers are responsible for preparing budgets and accordingly are tasked with ensuring that the Mayor is guarded against submitting a deficit budget to Council for adoption. Failure thereof may result in Councils implementing section 171 of the MFMA to both the Accounting Officer and Chief Financial Officer.

### 2. National Treasury Fiscal Grant reductions:

Over the 2024 MTEF, the local government equitable share and direct conditional grants will be reduced by a total of R15.5 billion, made up of R9.6 billion in the local government equitable share and R5.9 billion in direct conditional grants.

To make funds available for other government priorities, reductions have been made to some municipal conditional grants over the 2024 MTEF period.

These include an additional reduction of R3.5 billion to the integrated national electrification programme Eskom grant; an additional reduction of R73 million to the integrated urban development grant; an additional reduction of R14 million to the energy efficiency and demand-side management grant; an additional reduction of R4 million to the public transport network grant; an additional reduction of R127 million to the direct component of the regional bulk infrastructure grant; and an additional reduction of R852 million to the indirect component of the regional bulk infrastructure grant.

In addition to the infrastructure grants, municipalities also receive about 66 per cent of their allocations in unconditional grants, which can be utilised to fund operational parts of the LED initiatives. There is a need to align conditional grants with economic development areas while also ensuring their integration with other government spheres to support the developmental mandate effectively.

### **3. Revenue Management:**

The weak economic growth continues to impact the municipal finances and as communicated in MFMA Circular No. 89 this has strained consumers' ability to pay for services. Coupled with this conundrum is the marginal growth in national transfers as compared to the past.

These two critical factors necessitated the municipality to function optimally suggesting that municipal operations, processes and procedures must be efficient. Inefficiencies in this space are guaranteed to manifest on municipal finances.

#### **New conditional grant for smart prepaid meters**

A new indirect grant, which will be managed by the National Treasury, will be introduced in 2024/25. This grant will present an important opportunity for municipalities in the debt relief programme.

The potential beneficiaries of the smart meter grant will be invited by National Treasury and a compulsory template will be circulated for completion by municipalities.

### **4. Financial Risks and Challenges:**

Although the municipality has managed these challenges well, there are still financial risks and challenges which impacts directly on the distress and liquidity challenges. Here we make special

reference to the construction of the Regional Landfill site in Vredendal and the contribution, construction of our own Refuse Transfer Station in Clanwilliam.

The Regional Landfill site will be completed by end of November 2024 and is currently being constructed. The obligations from the municipality are to budget for the interest repayment for the first two financial years.

Therefore, the Cederberg municipality must maximize her revenue generating potential and collect what is due and concurrently, eliminate wasteful and non-core spending.

The municipal budget has been scrutinized to ensure that the municipality adequately provide for her core mandate and to service debt obligations.

The Municipality ensured that expenditure is limited to the maximum revenue collected and not spend money we do not have.

## **5. Balancing Development and Fiscal Sustainability:**

### **A: Setting Cost reflective tariffs**

The Municipality had to ensure that the capital repayment of loans is included in the cost when determining the tariffs. In addition, we must ensure that the consumption charges for services are only based on consumption and all other variable costs.

Therefore, fixed costs such as salary and wages, etc. should be covered by a fixed charge. This is a significant change in the tariffs setting process and is based on the National Treasury guideline.

Also during the budgeting process, provision must be made for revenue to be generated by the tariffs levied for services to address the maintenance of infrastructure. Old infrastructure must be replaced or at least optimally maintained to ensure that critical services are rendered and the clients of the municipality has uninterrupted delivery of core services.

## **6. Indigent Management**

It is critical to manage the restriction of free basic services to national policy limits. Therefore, free basic services to indigent households must be restricted. Where any unlimited supply or supply above national policy limits is provided, the budget narrative must explicitly articulate how this is funded also

in a context of facilitating adequate provision for related debt impairment and ability to maintain payment of Eskom, bulk water and other creditors.

Therefore the municipality will embark on a process of installing flow water meters and smart prepaid meters to those households whom qualify as Indigent households to ensure we adhere to the National Treasury regulations and guidelines.

The municipality is also in the process of adopting a project to roll out flow water meters and smart electricity prepaid meters to indigent clients to ensure that revenue is collected and losses curbed.

A new smart meter policy is also being adopted by Council for implementation.

In view of the aforementioned, the following table is a consolidated overview of the proposed 2024/25 Medium-term Revenue and Expenditure Framework:

**Table 1: Consolidated Overview of the 2023/2024 MTREF**

Description	2020/21	2021/22	2022/23	Current Year 2023/24			2024/25 Medium Term Revenue & Expenditure Framework

Capital Transfers and Subsidies (Allocations in-kind)	-	3 323 715.93	-	-	-	-	-	-	-
<i>Surplus/ (Deficit) for the year</i>	<b>19 700 036.72</b>	<b>6 333 900.34</b>	<b>48 012 597.25</b>	<b>47 981 473.00</b>	<b>59 018 455.00</b>	<b>59 018 455.00</b>	<b>55 725 853.00</b>	<b>64 959 836.00</b>	<b>63 373 157.00</b>
Total Capital Expenditure	44 451 218.80	53 246 603.84	48 048 591.19	85 994 625.00	81 041 930.00	81 041 930.00	77 582 005.00	86 669 298.00	79 488 392.00

Total operating revenue has grown by 6.23% or R26 208 million for the 2023/24 financial year when compared to the last 2023/24 Adjustments Budget. For the two outer years, operational revenue will increase by 8.42% in the 2025/2026 and 6.43% for 2026/2027 respectively, equating to a total revenue growth of R95 026 million over the MTREF mainly due to increase in grants.

Total operating expenditure for the 2024/2025 financial year has been appropriated at R452 113 million and translates into a budgeted surplus of R55 726 million after taking into consideration capital funding. When compared to the 2023/24 Adjustments Budget, operational expenditure has increased by 5.87% in the 2024/2025, by 8.69% in the 2024/2025 and by 8.27% in the 2026/2027 budget year.

The budget surplus for the two outer years steadily increases to R55 726 million for 2024/25 and increases to R64 960 million for 2025/26 and decreases slightly to R63 373 million in 2026/27 after

capital funding is accounted for. These surpluses will be used to fund capital expenditure and to further ensure cash backing of reserves and funds.

The capital budget of R77 582 million for 2024/2025 has decreased by 4.27% when compared to the 2023/24 Adjustment Budget due to Municipality's ability to pay for goods and services from own funds. The capital program amounts to R86 669 million in the 2025/2026 financial year and R79 488 million in the 2026/2027 financial year. The combination of equitable and own income sources were used to fund the projects over the MTREF.

The major portion of the capital budget will be funded from Government grants and subsidies. Though the municipality has the capacity to take on additional borrowings, it may not do so at the moment due to the strict adherence to regulations of compliance with the Eskom Debt Relief programme of National Treasury.

However the municipality will make contributions to capital projects from own funding to the amount of R16 848 million.

## 1.5 Operating Revenue Framework

For Cederberg Municipality to continue improving the quality of life of its communities through the delivery of services, it is necessary to generate sufficient revenue from rates and service charges. It is also important to ensure that all projected revenue is firstly correctly invoiced and secondly adequately collected. Therefore the municipality is embarking on a process to strengthen our debt collection department and also the implementation of handheld meter reading equipment to ensure accurate billing and invoicing.

As such, strict cost containment measures have been implemented in the MTREF to ensure the financial sustainability of the municipality.

The costs required to address the needs of the community will inevitably always exceed available generated income and thus compel the Municipality towards breakeven point through the implementation of tariffs increases.

The municipality's revenue strategy is built around the following key components:

- National Treasury's guidelines and macroeconomic policy;
- Revenue enhancement and growing the revenue base;
- Efficient revenue management, which aims to ensure an average of 92.0% annual collection rate for property rates and other key service charges;
- Electricity tariff increases as approved by the National Electricity Regulator of South Africa (NERSA);
- Moving towards cost reflective tariff increases for service charges over the MTREF;

Revenue generated from service charges remain the major source of revenue for the municipality amounting to R197 563 million (44.19%) of the total revenue.

The second largest source is grants and subsidies totaling R152 496 million and mainly comprises of equitable share allocated through the Division of Revenue Act, Municipal Infrastructure Grant (MIG), Integrated National Electrification Program (INEP), Regional Bulk Infrastructure Grant (RBIG) and Water Subsidy Infrastructure Grant (WSIG). Other operating grants include the Finance management grant and EPWP incentive grant.

Revenue from Property rates is the third largest revenue source totaling 16.94% or R72 725 million. Other major sources of revenue includes Interest from receivables, fines, penalties and forfeits, agency services and various other income sources

**Figure 1: Revenue by Source**

The table below illustrates transfers and grants allocated by National and Provincial Treasury for the MTREF.

### **1.5.1 Tariff Setting:**

Tariff-setting is a strategic part of the compilation of any budget. When rates, tariffs and other charges were revised, local economic conditions, the cost of supply and the affordability of services were taken into account to ensure the financial sustainability of the Municipality. Tariffs should be cost reflective in order to ensure full recovery of costs for providing each service.

The municipality must ensure that the consumption charges for services are only based on consumption and all other variable costs.

Therefore, fixed costs such as salary and wages, etc. should be covered by a fixed charge.

National Treasury and Provincial Treasury continues to encourage municipalities to maintain tariff increases at levels that reflect an appropriate balance between the affordability to poor households and other customers while ensuring the financial sustainability of the municipality.

Municipalities must justify in their budget narratives and all increases in excess of the projected inflation target for 2024/2025, which is estimated at 4.9%, and pay careful attention to tariff increase across all consumer groups. The Consumer Price Index (CPI) inflation is forecasted to be within the 4 to 6 per cent target band; therefore, municipalities are required to justify all increases in excess of the projected inflation target for 2024/25.

Excessive increases are counterproductive, resulting in higher levels of non-payment. In addition, municipalities should include a detail of their revenue growth assumptions for the different service charges in the budget narrative.

The municipality has, with the tabling of the draft budget proposed the following increases:

- Property rates: 2.50%
- Service charges – Electricity: 12.70%
- Service charges – Water: Basic: 12.00%
- Service charges – Water: usage: 2.00%
- Service charges - Waste Water Management: 6.00%
- Service charges - Waste Management: 12.00%

It is important to note that not all the above-mentioned tariffs are cost reflective. In addition Waste Management tariffs had to increase with a minimum of 12% to ensure that the municipality aligns its

Waste Removal tariff structure to make provision for the major increases due to the costs of construction and operations of the Regional Landfill site in conjunction with the construction of a transfer station in Clanwilliam, both which will serve the entire municipal area.

Even with the increases as stated all municipal services, except electricity is currently operated at a loss. However, the Municipality remains cognizant that increased tariffs will further place financial strain on our residents and therefore revisited our entire organizational structure to ensure that we keep our overhead costs to a minimum while still delivering services at acceptable levels and in compliance with legislation.

#### **1.5.1.1 Property Rates**

Property rates cover the cost of the provision of general services. Determining the effective property rate tariff is therefore an integral part of the municipality's budgeting process. The municipality's general valuation roll for the period 1 July 2022 to 30 June 2027 was completed and implemented with effect from 1 July 2022.

Revenue from property rates will be increased by 2.5% in the 2024/25 financial year. This is to maintain a balance in the total cost of the increase in the total client bill to the municipality and to alleviate the previous year's increases, especially with the implementation of the new and higher market related valuations of 2022.

The following stipulations in the Property Rates Policy are highlighted:

- Residential (In terms of section 6 of the Rates Policy; Domestic improved properties (excluding garages), valued at R100 000 and below are exempted from the payment of property rates.
- First 30% of the market value of public service infrastructure in terms of section 17(1) (a) of the Act is excluded from payment of rates.
- Pensioners- Relevant sliding scales:
  - o Taxpayers with income between R0 - R 5 000 per month (Represents income of the entire household and taxpayer is restricted to only one ordinarily place of residence. The taxpayer must be older than 60 years of age.) Must be a pensioner
  - o Taxpayers with income between R 5 001- R 10 000 per month (Represents income of the entire household and taxpayer is restricted to only one ordinarily place of residence. The taxpayer must be older than 60 years of age.) Must be a pensioner.

- Taxpayers with income of more than R 10 001 per month (Represents income of the entire household and taxpayer is restricted to only one ordinarily place of residence. The taxpayer must be older than 60 years of age and must be a pensioner.
- Provision is also made to new business incentives rebates which is a rebate granted, on a declining scale, on a property used for a new business brought to the Cederberg municipal area. The definition excludes existing business.

#### **1.5.1.2 Water tariff increases**

Cederberg Municipality faces similar challenges with regard to water supply, due to aged infrastructure, inadequate maintenance and repairs and the drought that were experienced in the Western few years ago. Water tariffs should be cost reflective and the municipality should ensure that water complies with all applicable quality standards. The water tariff structure must therefore ensure that:

- Water tariffs are fully cost-reflective – including the cost of maintenance and renewal of purification plants, water networks and the cost associated with reticulation expansion;
- Water tariffs are structured to protect basic levels of service and ensure the provision of free water to the poorest of the poor (indigent); and
- Water tariffs are designed to encourage efficient and sustainable consumption.

A tariff increase of 2% for water consumption will be implemented with effect from 1 July 2024; However the basic charge will be increased with 12% for all clients to recover fixed costs in delivering the service.

#### **1.5.1.3 Sale of Electricity and Impact of Tariff Increases**

NERSA has announced the revised bulk electricity pricing structure. The Municipality has embarked on a cost reflective study for electricity and tariffs have been submitted to NERSA for approval. However, the Municipality has not yet received feedback from NERSA regarding the proposed structure.

Bulk purchase will increase with 12.70% in line with Eskom's electricity tariff increase to municipalities. The municipal increase will therefore be 12.70%. The increase will be finalized when outcome from NERSA is received.

We foresee that the continued above average increase in electricity prices would result in lower consumption patterns of consumers in an attempt to mitigate the effect on their financial resources and thus reduce the projected Municipal electricity revenue. In addition, continued load shedding as well as the exploration of alternative energy sources by consumers already caused a significant decrease in electricity revenue.

Despite increased costs, higher levels of unemployment and poverty in our community, the Municipality will continue to provide free basic services to our increased registered indigent residents ((50 kWh per month).

#### **1.5.1.4 Sanitation and Impact of Tariff Increases**

A tariff increase of 6% for sanitation from 1 July 2024 is proposed. The increase in tariffs can also be ascribed to rising wage cost, the increase in electricity used in purification and pumping processes, the increase in fuel prices and the general increase in the price of goods and services.

It must also be emphasized that the municipality must ensure that purification processes complies with quality standards.

#### **1.5.1.5 Refuse Removal and Impact of Tariff Increases**

It was a requirement in budget Circular 66 and 67 that municipalities should strive to budget for a moderate surplus in order to ensure that the required funding levels are maintained and to ensure that the provision for the rehabilitation of the land fill site is cash backed. Currently solid waste removal is operating at a loss.

An increase of 12 % per cent increase in the waste removal tariff is proposed from 1 July 2024. The higher increase is to ensure that the Municipality can establish The Regional Landfill site which will be completed by end of November 2024 and is currently being constructed.

#### **1.5.2 Revenue from traffic fines**

Revenue from traffic fines were based on the results achieved the past few months since inception of the service provider's contract. The revenue form traffic fines are on the increase.

### 1.5.3 Overall impact of tariff increases on households

The following table shows the overall expected impact of the tariff increases on a large and small household, as well as an indigent household receiving free basic services.

**Table 4: Overall expected impact of tariff increases on households**

## 1.6 Operating Expenditure Framework

Cederberg Municipality's expenditure framework for the 2024/25 budget and MTREF is informed by the following:

- Balanced budget constraint (operating expenditure should not exceed operating revenue) unless there are existing uncommitted cash-backed reserves to fund any deficit;
- The financial recovery of the municipality to ensure the required funding levels are achieved and maintained.
- Addressing and maintaining a funded budget status, legacy issues in relation to Eskom, payment of creditors on time and escalating wage bill in order to focus on service delivery and financial sustainability
- Operational gains and efficiencies will be directed to ensure appropriate cash backing of statutory funds, provisions and reserves as well as funding the capital budget and other core services.
- Increasing staff productivity.
- Implement fully the cost containment policy and regulations.
- Roll out of new projects to increase revenue especially with focus on the implementation of flow water meters and smart electricity meters to indigents and or informal settlements.

### 1.6.1 Employee related cost

The budgeted allocation for employee related costs for the 2024/2025 financial year totals R155 612 million (including remuneration of Councilors), which equals 34.42% of the total operating expenditure. The *Salary and Wage Collective Agreement* for the period 01 July 2021 to 30 June 2024 has come to an end and a new agreement is under consultation, which is anticipated to consider the current fiscal constraints faced by government. Therefore, in the absence of any information in this regard from the South African Local Government Bargaining Council (SALGBC), municipalities are advised to consider their financial sustainability when considering salary increases. (Ref. Budget Circular 126.)

All current and new positions were budgeted for as per the new revised structure and organogram of the municipality.

### **1.6.2 Depreciation & asset impairment**

Provision for depreciation and asset impairment has been informed by the Municipality's asset management policy. Depreciation is widely considered a proxy for the measurement of the rate at which assets are consumed. Budget appropriations in this regard total R31 438 million for the 2024/2025 financial and equates to 6.95% of the total operating expenditure.

### **1.6.3 Finance Charges**

Finance charges consist primarily of the repayment of interest on long-term borrowing (cost of capital), interest charged for post-retirement benefits as well as interest charged for the rehabilitation of the landfill sites. Finance charges make up 2.64% (R11 926 million) of operating expenditure excluding annual redemption for 2024/2025 and decreases through the remainder of the MTREF. Cederberg Municipality has not reached its prudential limits for borrowing and care needs to be taken to ensure that annual finance charges remains within the affordability threshold of ratepayers and consumers considering the prevailing economic circumstances.

### **1.6.4 Bulk Purchases**

Bulk purchases are directly informed by the purchase of electricity from Eskom. The annual price increases have been factored into the budget appropriations and directly inform the revenue provisions. The allowable increase granted for the coming financial year is at 12.70 %. The expenditure includes distribution losses which currently equal 6.15% (Cederberg Municipality AFS, 2022/23) of the increased purchase price and are losses within acceptable norms.

### **1.6.5 Inventory consumed**

Inventory consumed comprise of amongst others the purchase of fuel, diesel, materials and spares for maintenance, cleaning materials and chemicals. In line with Cederberg Municipality's repairs and maintenance plan this group of expenditure has been prioritized to ensure sustainability of Cederberg Municipality's infrastructure. For 2024/2025 the appropriation against this group of expenditure is at R12 104 million which is a saving from the previous year of R 14 491 million. This was informed by circumstances experienced during the 2023/2024 financial year and due to strict cost containment measures implemented.

### **1.6.6 Contracted Services**

Contracted services relates to the provision of services by means of the appointment of service providers where the necessary in-house skills are not available or have not yet been adequately developed. Certain functions also require the contracting of specialist knowledge contracted from time to time due to the fact that the municipality cannot afford to employ experts on a fulltime basis. Contracted Services has significantly decreased mainly due to the decrease in the allocation Human Settlements. This group of expenditure has also been identified as an area in which cost savings and efficiencies has been achieved in line with the approved cost containment policy.

### **1.6.7 Operating Costs**

Other expenditure comprises of various line items relating to the daily operations of the municipality. This group of expenditure has also been identified as an area in which cost savings and efficiencies can be achieved in line with the approved cost containment policy. The increase is due to provision made for Cederberg's contribution to the Regional landfill site.

Cederberg Municipality has implemented the cost containment measures on the following focus areas namely, consultancy fees, travel and related costs, advertising, catering, events costs and accommodation. With the implementation of cost containment measures, Cederberg municipality is trying to control unnecessary spending on nice-to-have items and non-essential and non-priority activities.

The following table is a high level summary of the 2024/25 budget and MTREF (classified per main type of operating expenditure):

**Table 5: Operating Expenditure by type**

The following graph gives a breakdown of main expenditure categories for the 2024/2025 financial year:

**Figure 2: Expenditure by Type**

### **1.6.8 Transfers and Grants**

Transfer and grants consist out of cash and non-cash transfers to other, organizations and or individuals. The provision for the 2024/25 MTREF is at R120 thousand and increases to R126 thousand and R131 thousand in the outer years. This type of expenditure will be utilized within a policy framework where organizations and or individuals apply through a grant in aid policy for assistance by the Municipality.

### **1.6.9 Repairs and maintenance**

In order to ensure the health of the assets of the municipality and to prolong the useful lives, it is necessary to ensure that repairs and maintenance is adequately budgeted. Budget circular 126 cautions municipalities to ensure that sufficient budgetary allocation is made for this expenditure; the following table is a consolidation of all the expenditures associated with repairs and maintenance. Asset management is a strategic imperative for any municipality and needs to be prioritized as a spending objective in the budget of municipalities.

The municipality has made great strides to achieve both these benchmarks. A large contributing factor to reaching the required levels of repairs and maintenance can be attributed to the costing system of the municipality where employee related and other costs directly related to repairs and maintenance projects are not factored accurately.

Repairs & maintenance is increased from R34 610 million in the 2023/2024 financial year to R36 050 million in 2024/2025 budget year. As part of the 2024/25 MTREF this strategic imperative remains a priority as can be seen by the budget appropriations over the MTREF. The allocation to repairs & maintenance gradually increases over the MTREF and is reliant on the financial recovery of the municipality to be further supplemented.

The municipality is still below Treasury's norm but it does however believe that maintenance plans will directly inform the budget.

### **1.6.10 Free Basic Services: Basic Social Services Package**

The social package assists households that are poor or face other circumstances that limit their ability to pay for services. To receive these free services the households are required to register in terms of Cederberg Municipality's Indigent Policy. It is estimated that between 2000 and 2200 households will receive subsidy on tariffs and rates in the 2024/2025 financial year by means of the full basket of services given as Indigent subsidies, for services at sub-economic tariffs. The estimated expenditure on free and subsidized services amounts to R14 970 million for the 2024/2025 financial year.

The indigent process is one of self-registration therefore households needing assistance must annually apply for the subsidy. Detail relating to free services, cost of free basis services, revenue lost owing to free basic services as well as basic service delivery measurement is contained in below in MBRR Table A10 (Basic Service Delivery Measurement)

The cost of the social package of the registered indigent households is largely financed by national government through the local government equitable share received in terms of the annual Division of Revenue

**Table 7: Cost of providing free basic services:**

## 1.7 Capital expenditure

The capital expenditure framework totals R 243 739 million over the MTREF, of which R 77 582 million is allocated for the 2024/25 financial year. Capital expenditure is displayed in a number of ways in the tables and figure below.

Table 8 illustrates the capital expenditure appropriated for multi- and single year per vote.

**Table 8: Budgeted capital expenditure by vote**

The capital budget is funded from a mixture of grants received from National Treasury, Provincial Treasury, borrowing and internally generated funds.

With specific reference to the Desalination plant the municipality had obtained a specialist technical recommendation on the way forward in terms of completing the marine outfall. Additionally, the municipality will now obtain a detailed cost estimate for the refurbishment of the plant as this is crucial in the addressing of findings related to the Auditor-General report 2022/2023 financial year.

## 1.8 Annual Budget Tables

The following pages present the ten main budget tables as required in terms of section 8 of the Municipal Budget and Reporting Regulations. These tables set out the municipality's 2024/25 budget and MTREF to be approved by the Council.

**Table 10: MBRR A1 - Budget Summary**

### **Explanatory notes to MBRR Table A1 - Budget Summary**

1. Table A1 is a budget summary and provides a concise overview of the Municipality's budget from all of the major financial perspectives (operating, capital expenditure, financial position, cash flow, and MFMA funding compliance).
2. The table provides an overview of the amounts approved by Council for operating performance, resources deployed to capital expenditure, financial position, cash and funding compliance, as well as the municipality's commitment to eliminating basic service delivery backlogs.
3. Financial management reforms emphasize the importance of the municipal budget being funded. This requires the simultaneous assessment of the Financial Performance, Financial Position and Cash Flow Budgets, along with the Capital Budget. The Budget Summary provides the key information in this regard:
  - a. The accumulated surplus is positive over the MTREF
  - b. Capital expenditure is balanced by capital funding sources, of which
    - i. Transfers recognized is reflected on the Financial Performance Budget;
    - ii. Borrowing is incorporated in the net cash from financing on the Cash Flow Budget

**Explanatory notes to MBRR Table A2 - Budgeted Financial Performance (revenue and expenditure by functional classification)**

1. Table A2 is a view of the budgeted financial performance in relation to revenue and expenditure per functional classification. The modified GFS standard classification divides the municipal services into 16 mSCOA functional areas. Municipal revenue, operating expenditure and capital expenditure are then classified in terms of each of these functional areas which enables the National Treasury to compile 'whole of government' reports.
2. Note that as a general principle the revenues for the Trading Services should exceed their expenditures.

3. Other functions that show a deficit between revenue and expenditure are being financed from rates revenues and other revenue sources.
4. The table includes capital grant revenue, but excludes internal charges between various departments such as electricity, water, sanitation and refuse. These items, although correctly included/excluded, should also be taken into account before coming to any conclusion with regards to the cost reflectiveness of tariffs and fees raised by the municipality.

**Explanatory notes to MBRR Table A3 - Budgeted Financial Performance (revenue and expenditure by municipal vote)**

Table A3 is a view of the budgeted financial performance in relation to the revenue and expenditure per municipal vote. This table facilitates the view of the budgeted operating performance in relation to the organizational structure of the Municipality. This means it is possible to present the operating surplus or deficit of a vote.

**Table 13: MBRR Table A4 - Budgeted Financial Performance (revenue and expenditure)**

**Explanatory notes to Table A4 - Budgeted Financial Performance (revenue and expenditure)**

1. Table A4 represents the revenue per source as well as the expenditure per type. This classification is aligned to the GRAP disclosures in the annual financial statements of the municipality as well as the mSCOA reporting framework.

**Table 14: MBRR A5 - Budgeted Capital Expenditure by vote, functional classification and funding source**

**Explanatory notes to Table A5 - Budgeted Capital Expenditure by vote, functional classification and funding source**

1. Table A5 is a breakdown of the capital programme in relation to capital expenditure by municipal vote (multi-year and single-year appropriations); capital expenditure by functional classification; and

the funding sources necessary to fund the capital budget, including information on capital transfers from national and provincial departments.

2. The MFMA provides that a municipality may approve multi-year or single-year capital budget appropriations.
3. Unlike multi-year capital appropriations, single-year appropriations relate to expenditure that will be incurred in the specific budget year such as the procurement of vehicles and specialized tools and equipment. The budget appropriations for the two outer years are indicative allocations based on the departmental business plans as informed by the IDP and will be reviewed on an annual basis to assess the relevance of the expenditure in relation to the strategic objectives and service delivery imperatives of the Municipality. For the purpose of funding assessment of the MTREF, these appropriations have been included but no commitments will be incurred against single-year appropriations for the two outer-years.
4. The capital program is funded from National, Provincial and Other grants and transfers, borrowing and internally generated funds from current and prior year surpluses.

**Explanatory notes to Table A6 - Budgeted Financial Position**

1. Table A6 is consistent with international standards of good financial management practice, and improves understandability for councilors and management of the impact of the budget on the statement of financial position (balance sheet).
2. This format of presenting the statement of financial position is aligned to GRAP1, which is generally aligned to the international version which presents Assets less Liabilities as “accounting” Community Wealth. The order of items within each group illustrates items in order of liquidity; i.e. assets readily converted to cash, or liabilities immediately required to be met from cash, appear first.

3. Table A6 is supported by an extensive table of notes (SA3) providing a detailed analysis of the major components of a number of items, including:
  - Call investments deposits;
  - Consumer debtors;
  - Property, plant and equipment;
  - Trade and other payables;
  - Provisions non-current;
  - Changes in net assets; and
  - Reserves
4. The municipal equivalent of equity is Community Wealth/Equity. The justification is that ownership and the net assets of the municipality belong to the community.
5. Any movement on the Budgeted Financial Performance or the Capital Budget will inevitably impact on the Budgeted Financial Position. As an example, the collection rate assumption will impact on the cash position of the municipality and subsequently inform the level of cash and cash equivalents at year end. Similarly, the collection rate assumption should inform the budget appropriation for debt impairment which in turn would impact on the provision for bad debt. These budget and planning assumptions form a critical link in determining the applicability and relevance of the budget as well as the determination of ratios and financial indicators. In addition the funding compliance assessment is informed directly by forecasting the statement of financial position.

**Explanatory notes to Table A7 - Budgeted Cash Flow Statement**

1. The budgeted cash flow statement is the first measurement in determining if the budget is funded.
2. It shows the expected level of cash in-flow versus cash out-flow that is likely to result from the implementation of the budget.

**Explanatory notes to Table A8 - Cash Backed Reserves/Accumulated Surplus Reconciliation**

1. The cash backed reserves/accumulated surplus reconciliation is aligned to the requirements of MFMA Circular 42 – Funding a Municipal Budget.
2. In essence the table evaluates the funding levels of the budget by firstly forecasting the cash and investments at year end and secondly reconciling the available funding to the liabilities/commitments that exist.
3. The outcome of this exercise would either be a surplus or deficit. A deficit would indicate that the applications exceed the cash and investments available and would be indicative of non-compliance with the MFMA requirements that the municipality’s budget must be funded.
4. As part of the budgeting and planning guidelines that informed the compilation of the 2024/25 MTREF the end objective of the medium-term framework is to ensure the budget is funded and aligned to section 18 of the MFMA.

### Explanatory notes to Table A9 - Asset Management

1. Table A9 provides an overview of municipal capital allocations to building new assets and the renewal of existing assets, as well as spending on repairs and maintenance by asset class.
2. National Treasury has recommended that municipalities should allocate at least 40% of their capital budget to the renewal of existing assets, and allocations to repairs and maintenance should be 8% of PPE.

3. The Municipality does not meet the requirement that 40% of the capital budget should be allocated to renewal of existing assets, as well as the requirement of RME to be 8% of PPE as RME is only 4.2% of PPE.

## **2 Part 2: Supporting Documentation**

### **2.1 Overview of the annual budget process**

#### **2.1.1 Political oversight of the Budget Process**

Section 53 (1) (a) of the MFMA (no 56 of 2003) stipulates that the Mayor of a municipality must provide general political guidance over the budget process and the priorities that must guide the preparation of a budget. It is also necessary to ensure that the needs and priorities of the community, as set out in the IDP, are properly linked to the municipality's spending plans.

In addition Chapter 2 of the Municipal Budget and Reporting Regulations states that the Mayor of the municipality must establish a Budget Steering Committee to provide technical assistance to the Mayor in discharging the responsibilities set out in section 53 of the Act.

The budget has been reviewed by the mayor and concerns were addressed.

#### **2.1.2 Schedule of Key Deadlines relating to the Budget Process**

The mayor must, according to the MFMA, co-ordinate the processes for preparing the annual budget and for reviewing the municipality's IDP and budget-related policies. The mayor therefore tabled a schedule of key deadlines with regards to the budgetary process and the review of the municipality's IDP.

**Table 20: Schedule of key deadlines**

<b>TIME SCHEDULE FOR IDP REVIEW PROCESS</b>					
NO	ACTIVITY/TASK	RESPONSIBLE OFFICIAL	TARGET DATES		
			IDP	BUDGET	PMS
<b>AUGUST 2023</b>					
1	2022/2023 4 <sup>th</sup> Quarter Performance (Section 52) Report tabled to Council	IDP/PMS			31/08/2023

75	Table Annual Performance Report and Annual Financial Statements to Council	IDP/PMS		30/08/2024	30/08/2024
76	Submit the Annual Performance Report and Annual Financial Statements to the Auditor-General	IDP/PMS CFO		30/08/2024	30/08/2024

### **2.1.3 Purpose of the Budget and IDP Process Plan**

The purpose of the process plan is to indicate the various planned activities and strategies on which the municipality will embark to compose its Integrated Development Plan for the five year cycle and the budget for the 2024/2025 financial year and the two outer years.

The process plan enhances integration and alignment between the IDP and the Budget, thereby ensuring the development of an IDP-based budget. It fulfils the role of an operational framework for the IDP and Budget process outlining the manner in which this process was undertaken. In addition, it identifies the activities in the processes around the key statutory annual operational processes of the budget and IDP compilation, performance management implementation and the adoption of the municipality's annual report.

### **2.1.4 IDP and Service Delivery and Budget Implementation Plan**

The Municipality's IDP is its principal strategic planning instrument, which directly guides and informs its planning, budget, management and development actions. This framework is rolled out into objectives, key performance indicators and targets for implementation which directly inform the Service Delivery and Budget Implementation Plan.

## **2.2 Overview of alignment of annual budget with IDP**

The Constitution mandates local government with the responsibility to exercise local developmental and cooperative governance. The eradication of imbalances in South African society can only be realized through a credible integrated developmental planning process.

Municipalities in South Africa need to utilise integrated development planning as a method to plan future development in their areas and so find the best solutions to achieve sound long-term development goals. A municipal IDP provides a five year strategic programme of action aimed at setting short, medium and long term strategic and budget priorities to create a development platform, which correlates with the term of office of the political incumbents.

The plan aligns the resources and the capacity of a municipality to its overall development aims and guides the municipal budget.

An IDP is therefore a key instrument which municipalities use to provide vision, leadership and direction to all those that have a role to play in the development of a municipal area. The IDP enables municipalities to make the best use of scarce resources and speed up service delivery.

Integrated developmental planning in the South African context is amongst others, an approach to planning aimed at involving the municipality and the community to jointly find the best solutions towards sustainable development. Furthermore, integrated development planning provides a strategic environment for managing and guiding all planning, development and decision making in the municipality.

It is important that the IDP developed by municipalities correlate with National and Provincial intent. It must aim to co-ordinate the work of local and other spheres of government in a coherent plan to improve the quality of life for all the people living in that area. Applied to the Municipality, issues of national and provincial importance should be reflected in the IDP of the municipality. A clear understanding of such intent is therefore imperative to ensure that the Municipality strategically complies with the key national and provincial priorities.

The 2024/25 MTREF has therefore been directly informed by the IDP process and the following tables provide the reconciliation between the IDP strategic objectives and operating revenue, operating expenditure and capital expenditure.

**Table 21: MBRR SA4 - Reconciliation of IDP strategic objectives and budget (revenue)**

**2.2.1 Measurable performance objectives and indicators**

Performance Management is a system intended to manage and monitor service delivery progress against the identified strategic objectives and priorities. In accordance with legislative requirements and good business practices as informed by the National Framework for Managing Programme Performance Information, the Municipality has developed and implemented a performance management system of which system is constantly refined as the integrated planning process unfolds. The Municipality target, monitors, assesses and reviews organisational performance which in turn is directly linked to individual employee’s performance.

At any given time within government, information from multiple years is being considered; plans and budgets for next year; implementation for the current year; and reporting on last year's performance. Although performance information is reported publicly during the last stage, the performance information process begins when policies are being developed, and continues through each of the planning, budgeting, implementation and reporting stages.

**Table 24: SA7 - Measurable performance objectives**

## 2.2.2 Performance indicators and benchmarks

### 2.2.2.1 Borrowing Management

Capital expenditure in local government can be funded by capital grants, own-source revenue and long term borrowing. The ability of a municipality to raise long term borrowing is largely dependent on its creditworthiness and financial position.

#### 2.2.2.1.1 Long Term Debt as % of Revenue

External borrowing is an important part of the funding model of the municipality. Not only does it instantly provide the municipality with relatively inexpensive capital to fast-track service delivery and infrastructure backlogs, but it also ensures that the user of the infrastructure pay for the use over the lifetime of the asset. The current capital program provides for a significant portion of the program to be financed through external financing.

The norm for long term debt as percentage of revenue is 45%. The municipality's is maintaining funding levels of below 6% which is indicative that there is capacity to take on additional long-term debt. When considering additional long term debt, the ability to repay the long term debt has to be considered.

Figure 4: Borrowings as % of operating revenue

### 2.2.2.2 Safety of Capital

*The gearing ratio* is a measure of the total long term borrowings over funds and reserves.

### 2.2.2.3 Liquidity

**The Liquidity ratio** is a measure of the ability of the Municipality to utilise cash and cash equivalents to extinguish or retire its current liabilities immediately. The norm set by National Treasury is 1:1. The Municipality performed as follows:

- At June 2023: 0:46
- At January 2024: 1:36

This indicator provides a measure of the municipality's ability to settle short term liabilities when they become due and payable. Ideally the municipality should have the equivalent cash and cash equivalents on hand to meet at least the current liabilities, which should translate into a liquidity ratio of 1. Anything below 1 indicates a shortage in cash to meet creditor obligations.

#### 2.2.2.3.1 Short Term Debt as % of Cash

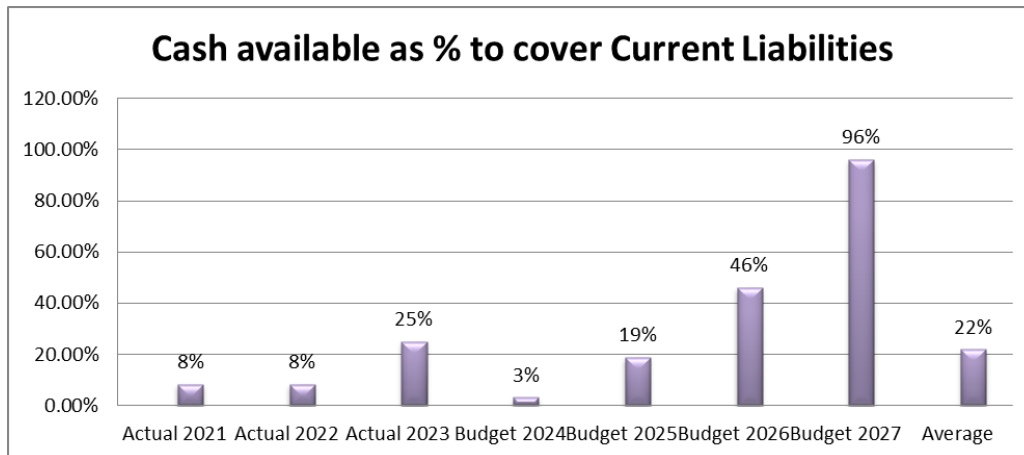

This indicator provides a measure of the municipality's ability to settle short term liabilities when they become due and payable.

**The current ratio** is a measure of the ability of the Municipality to pay its short-term obligations with its short term assets. The standard norm for this ratio in terms of National treasury must be 2:1.

The current ratio has been under the norm for the last ten financial years and including the current financial year. This ratio although improves it is still not sufficient to be within the norm over the MTREF.

At January 2024: 1:13

However the municipality is constantly working on improving the cash flow which will result in an increase over the MTREF as indicated in the graph below.

**Figure 5: Current liabilities as % of cash**

### 2.2.2.4 Revenue Management

As part of the financial sustainability strategy, an aggressive revenue management framework has been implemented to increase cash inflow, not only from current billings but also from debtors that are in arrears in excess of 90 days. The intention of the strategy is to streamline the revenue value chain by ensuring accurate billing, customer service, and credit control and debt collection. Payment levels and credit control is considered to be favorable.

#### 2.2.2.4.1 Payment Level

The credit control, debt collection and customer care policy has been amended to bring about improvements which result in an increased collection rate for 2023/24 financial year. This is expected to stabilise and or increase in the new financial year. An average of 92% payment ratio was achieved and the municipality is aiming to achieve the 95% as by National Treasury standards.

The municipality aims to achieve a collection rate of 92% and has accordingly budgeted as such for 2024/25. This is in line with the actual current collection rate of 2023/24. This will be achieved by implementing more stringent credit control measures. Secondly, a debtor’s data cleansing exercise is being undertaken in the current financial year, which will attribute to revenue enhancement and ultimately revenue collection.

**Figure 6: Consumer Debtor's Payment level**

### 2.2.2.5 Creditors Management

The Municipality has significantly increased its liquidity ratios and will strive to ensure that creditors are settled within the legislated 30 days of invoice or statement.

#### *Other Indicators*

Employee costs are one of the main cost drivers in any municipality. Any increase in this balance should be carefully considered.

Repairs and maintenance as percentage of operating revenue is showing an increasing trend over the MTREF. This is mainly due to the allocation of Employee Related Costs to Repairs and Maintenance when the Employee Related cost is related to a repairs and maintenance project.

#### 2.2.2.5.1 Asset Test Ratio

The asset test ratio provides with an indication of the municipality's ability to settle liabilities as and when they become due.

The ratio is calculated as the Current Assets (incl. inventory) compared to Current Liabilities. The benchmark for the said ratio is 2:1.

The table below indicates that over the period, the municipality was significantly below the norm of 2:1. However, with the approval of the 2024/25 MTREF the municipality aims to at least meet a ratio of 1.28:1 and 2.02:1 by 2027.

**Figure 7: Asset test ratio**

### 2.2.2.5.2 Purchase of PPE as % of Cash Generated

This indicator measures the ability of the municipality to finance the capital program from cash generated in the same financial period. Any indicator above 100% is indicative of a shortfall in cash which increases the need to utilise accumulated cash resources from prior years.

The graph below further states that the municipality have very little ability to incur capital expenditure by utilising accumulated cash resources for the 2024/25 MTREF.

**Figure 8: PPE as % of cash generated**

### 2.2.2.5.3 Debtor Turnover Days

The indicator provides an indication of how many days it takes to convert billed revenue into cash. Thus, it is a good indicator of how credit control and debt collection measures are being implemented at the municipality.

The current debtor's turnover days for 2023/24 are 43 and based on budgeted figures it is projected to be 37 days by end of 2027.

As it is projected that the debtor’s days will be 41 days in the 2024/25 financial year, the municipality has to maintain high standards to collect debt from each consumer group. Credit control procedures have to be implemented more stringent than currently is, in order for the municipality to decrease its debtor’s days to below 30 days.

**Figure 9: Debtor turnover days**

#### 2.2.2.5.4 Cash Funded Budget over the MTREF

A cash funded budget is arguably the most important indicator for a credible budget that is aligned to the funding requirement in MFMA Section 18.

As illustrated in the table below, the municipality is slowly managing itself out of an unfunded budget in the 2024/25 MTREF.

**Figure 10: Cash Funded Budget**

## 2.3 Overview of budget related-policies

The budget related policies have been reviewed and are tabled in conjunction with the draft budget.

## 2.4 Overview of budget assumptions

### 2.4.1 External factors

The recovery rate of service debtors and rates are budgeted at 92.0%. The recovery rate of fines, which is also considered a significant revenue source, is approximately 8.1%.

### 2.4.2 General inflation outlook and its impact on the municipal activities

The inflation outlook for South Africa is indicated below and has been taken into consideration in the compilation of the 2024/25 MTREF.

Fiscal year	2022/23	2023/24	2024/25	2025/26	2026/27
	Actual	Estimate	Forecast		
CPI Inflation	6.9%	6.0%	4.9%	4.6%	4.6%

*Source: 2024 budget review.*

**Figure 11: CPI projections**

### 2.4.3 Credit rating outlook

The credit outlook of South Africa remained under pressure, given the fact that the credit rating is currently being reviewed by major credit agencies. The National Treasury estimates real economic growth of 0.6 per cent in 2023.

This is a decrease from growth of 0.8 per cent projected in the 2023 MTBPS due to weaker than expected outcomes in the third quarter of 2023, resulting in downward revisions to household spending growth and spending on gross fixed investment. GDP growth is projected to average 1.6 per cent from 2024 to 2026 as the frequency of power cuts declines, lower inflation supports household consumption, and employment and credit extensions recover gradually.

### 2.4.4 Interest rates for borrowing and investment of funds

Headline inflation is projected to moderate from 6 per cent in 2023/24 to 4.9% in 2025, 4.6 per cent in 2026 and 2027

#### **2.4.5 Collection rate for revenue services**

The base assumption is that tariff and rating increases will increase at a rate slightly higher than CPI over the long term. It is also assumed that current economic conditions, and relatively controlled inflationary conditions, will continue for the forecasted term.

The rate of revenue collection is currently expressed as a percentage of annual billings. Cash flow is assumed to be 92% of billings. The performance of any increased collections or arrear collections will however only be considered a source of additional cash in-flow once the performance has been carefully monitored.

#### **2.4.6 Growth or decline in tax base of the municipality**

Debtor's revenue is assumed to increase at a rate that is influenced by the consumer debtor's collection rate, tariff/rate pricing, real growth rate of the Municipality, household formation growth rate and the poor household change rate.

Household formation is the key factor in measuring municipal revenue and expenditure growth, as servicing 'households' is a greater municipal service factor than servicing individuals. Household formation rates are assumed to convert to household dwellings.

In addition the change in the number of poor households influences the net revenue benefit derived from household formation growth, as it assumes that the same costs incurred for servicing the household exist, but that no consumer revenue is derived as the 'poor household' limits consumption to the level of free basic services.

#### **2.4.7 Salary increases**

The Municipality has not received the new Salary and Wage Collective Agreement yet. For budget purposes, increases for all employees covered in this agreement were based on average projected CPI at 4.9% including notch increase of 2.5%.

### **2.4.8 Impact of national, provincial and local policies**

Integration of service delivery between national, provincial and local government is critical to ensure focussed service delivery and in this regard various measures were implemented to align IDPs, provincial and national strategies around priority spatial interventions. In this regard, the following national priorities form the basis of all integration initiatives:

- The quality of school education;
- Infrastructure is poorly located, inadequate and under-maintained;
- Spatial divides hobble inclusive development;
- The economy is unsustainably resource intensive;
- The public health system cannot meet demand or sustain quality;
- Public services are uneven and often of poor quality;
- Corruption levels are high; and
- South Africa remains a divided society.

To achieve these priorities integration mechanisms are in place to ensure integrated planning and execution of various development programs. The focus will be to strengthen the link between policy priorities and expenditure thereby ensuring the achievement of the national, provincial and local objectives.

## 2.5 Overview of budget funding

### 2.5.1 Medium-term outlook: operating revenue

The table below sets out the budgeted operating revenue over the medium term.

**Table 26: Breakdown of operating revenue over MTREF**

Tariff setting plays a major role in ensuring desired levels of revenue. Getting tariffs right assists in the compilation of a credible and funded budget. The Municipality derives most of its operational revenue from the provision of goods and services such as water, electricity, sanitation, solid waste removal, property rates, operating grants and other minor charges (such as building plan fees, licenses and permits etc.).

Investment revenue contributes marginally to the revenue base of the Municipality. It needs to be noted that these allocations have been conservatively estimated and as part of the cash backing of reserves and provisions. It should also be noted that given the financial position of Cederberg Municipality, it is currently difficult to invest excess funds. The actual performance against budget will be carefully monitored. Any variances in this regard will be addressed as part of the mid-year review and adjustments budget.

## 2.5.2 Cash Flow Management

Cash flow management and forecasting is a critical step in determining if the budget is funded over the medium-term. The table below is consistent with international standards of good financial management practice and also improves understandability for councilors and management. Some specific features include:

1. Clear separation of receipts and payments within each cash flow category;
2. Clear separation of capital and operating receipts from government, which also enables cash from 'Ratepayers and other' to be provide for as cash inflow based on actual performance. In other words the *actual collection rate* of billed revenue., and
3. Separation of borrowing and loan repayments (no set-off), to assist with MFMA compliance assessment regarding the use of long term borrowing (debt).

**Table 30: Budgeted cash flow statement**

**Figure 12: Cash flow forecast**

### 2.5.3 Cash Backed Reserves/Accumulated Surplus Reconciliation

This following table meets the requirements of MFMA Circular 42 which deals with the funding of a municipal budget in accordance with sections 18 and 19 of the MFMA. The table seeks to answer three key questions regarding the use and availability of cash:

1. What are the predicted cash and investments that are available at the end of the budget year?
2. How are those funds used?
3. What is the net funds available or funding shortfall?

A surplus would indicate the cash-backed accumulated surplus that was/is available. A shortfall (applications > cash and investments) is indicative of non-compliance with section 18 of the MFMA requirement that the municipality’s budget must be ‘funded’. Non-compliance with section 18 is assumed because a shortfall would indirectly indicate that the annual budget is not appropriately funded (budgeted spending is greater than funds available or to be collected).

Table 31 indicates that Cederberg’s budget is funded for the 2024/25 financial year and the MTREF.

The goal of the municipality is to increase cash levels in order to allow for a contribution to the capital replacement reserve.

Unspent conditional transfers (grants) are automatically assumed to be an obligation as the municipality has received government transfers in advance of meeting the conditions. Ordinarily, unless there are special circumstances, the municipality is obligated to return unspent conditional grant funds to the national revenue fund at the end of the financial year.

The main purpose of other working capital is to ensure that sufficient funds are available to meet obligations as they fall due. A key challenge is often the mismatch between the timing of receipts of funds from debtors and payments due to employees and creditors. High levels of debtor non-payment and receipt delays will have a greater requirement for working capital, resulting in cash flow challenges.

### 2.5.4 Funding compliance measurement

National Treasury requires that the municipality assess its financial sustainability against fourteen different measures that look at various aspects of the financial health of the municipality. These measures are contained in the following table. All the information comes directly from the annual budgeted statements of financial performance, financial position and cash flows. The funding compliance measurement table essentially measures the degree to which the proposed budget complies with the funding requirements of the MFMA.

**Table 32: MBRR SA10 Funding compliance measurement**

<b>References</b>													
1. Positive cash balances indicative of minimum compliance - subject to 2													
2. Deduct cash and investment applications (defined) from cash balances													
3. Indicative of sufficient liquidity to meet average monthly operating payments													
4. Indicative of funded operational requirements													
5. Indicative of adherence to macro-economic targets (prior to 2003/04 revenue not available for high capacity municipalities and later for other capacity classifications)													
6. Realistic average cash collection forecasts as % of annual billed revenue													
7. Realistic average increase in debt impairment (doubtful debt) provision													
8. Indicative of planned capital expenditure level & cash payment timing													
9. Indicative of compliance with borrowing 'only' for the capital budget - should not exceed 100% unless refinancing													
10. Substantiation of National/Province allocations included in budget													
11. Indicative of realistic current arrear debtor collection targets (prior to 2003/04 revenue not available for high capacity municipalities and later for other capacity classifications)													
12. Indicative of realistic long term arrear debtor collection targets (prior to 2003/04 revenue not available for high capacity municipalities and later for other capacity classifications)													
13. Indicative of a credible allowance for repairs & maintenance of assets - functioning assets revenue protection													
14. Indicative of a credible allowance for asset renewal (requires analysis of asset renewal projects as % of total capital projects - detailed capital plan) - functioning assets revenue protection

### 2.5.4.1 Cash/cash equivalent position

A 'positive' cash position, for each year of the MTREF would generally be a minimum requirement, subject to the planned application of these funds such as cash-backing of reserves and working capital requirements. Cederberg budgets to have a positive cash/cash equivalent balance at the end of each budget year for the MTREF.

### 2.5.4.2 Cash plus investments less application of funds

The purpose of this measure is to understand how the municipality has applied the available cash and investments as identified in the budgeted cash flow statement.

#### **2.5.4.3 Monthly average payments covered by cash or cash equivalents**

The purpose of this measure is to understand the level of financial risk should the municipality be under stress from a collection and cash in-flow perspective. Cederberg has improved in meeting its obligations as they become due, as can be seen from the current ratio.

Increased efforts in collection of current and outstanding debt have been affected and cost containment measures have been put in place to manage and improve the cash position of the Municipality

#### **2.5.4.4 Surplus/deficit excluding depreciation offsets**

The main purpose of this measure is to understand if the revenue levels are sufficient to conclude that the community is making a sufficient contribution for the municipal resources consumed each year.

#### **2.5.4.5 Property Rates/service charge revenue as a percentage increase less macro inflation target**

The purpose of this measure is to understand whether the municipality is contributing appropriately to the achievement of national inflation targets. This measure is based on the increase in 'revenue', which will include both the change in the tariff as well as any assumption about real growth such as new property development, services consumption growth etc.

#### **2.5.4.6 Cash receipts as a percentage of ratepayer and other revenue**

This factor is a macro measure of the rate at which funds are 'collected'. This measure is intended to analyse the underlying assumed collection rate for the MTREF to determine the relevance and credibility of the budget assumptions contained in the budget.

#### **2.5.4.7 Debt impairment expense as a percentage of billable revenue**

This factor measures whether the provision for debt impairment is being adequately funded and is based on the underlying assumption that the provision for debt impairment (doubtful and bad debts) has to be increased to offset under-collection of billed revenues.

#### **2.5.4.8 Capital payments percentage of capital expenditure**

The purpose of this measure is to determine whether the timing of payments has been taken into consideration when forecasting the cash position. The municipality managed to keep this as low as possible throughout the 2023/24.

#### **2.5.4.9 Borrowing as a percentage of capital expenditure (excluding transfers, grants and contributions)**

The purpose of this measurement is to determine the proportion of a municipality's 'own-funded' capital expenditure budget that is being funded from borrowed funds to confirm MFMA compliance. Externally funded expenditure (by transfers/grants and contributions) has been excluded.

#### **2.5.4.10 Transfers/grants revenue as a percentage of Government transfers/grants available**

The purpose of this measurement is mainly to ensure that all available transfers from national and provincial government have been budgeted for. A percentage less than 100% could indicate that not all grants as contained in the Division of Revenue Act (DoRA) have been budgeted for. Cederberg Municipality has budgeted for all transfers.

#### **2.5.4.11 Consumer debtors change (Current and Non-current)**

The purpose of these measures is to ascertain whether budgeted reductions in outstanding debtors are realistic. There are 2 measures shown for this factor; the change in current debtors and the change in long term receivables, both from the Budgeted Financial Position.

#### **2.5.4.12 Repairs and maintenance expenditure level**

This measure must be considered important within the context of the funding measures criteria because a trend that indicates insufficient funds are being committed to asset repair could also indicate that the overall budget is not credible and/or sustainable in the medium to long term because the revenue budget is not being protected.

#### **2.5.4.13 Asset renewal/rehabilitation expenditure level**

This measure has a similar objective to aforementioned objective relating to repairs and maintenance. A requirement of the detailed capital budget (since MFMA Circular 28 which was issued in December 2005) is to categorize each capital project as a new asset or a renewal/rehabilitation project. The

objective is to summarize and understand the proportion of budgets being provided for new assets and also asset sustainability. A declining or low level of renewal funding may indicate that a budget is not credible and/or sustainable and future revenue is not being protected, similar to the justification for 'repairs and maintenance' budgets.

## 2.6 Expenditure on grants and reconciliations of unspent funds

## **2.10 Annual budgets and service delivery and budget implementation plans – internal departments**

Refer to the SDBIP

## **2.11 Annual budgets and service delivery agreement – municipal entities and other external mechanisms**

Not applicable as the municipality does not have any entities or external mechanisms

## **2.12 Contracts having future budgetary implications**

In terms of the Municipality's Supply Chain Management Policy, no contracts are awarded beyond the medium-term revenue and expenditure framework (three years). In ensuring adherence to this contractual time frame limitation, all reports submitted to either the Bid Evaluation and Adjudication Committees must obtain formal financial comments from the Financial Management Division of the Treasury Department.

## 2.13 Capital expenditure details

The following six tables present details of the Municipality's capital expenditure programme.

**Table 46: MBRR SA34a - Capital expenditure on new assets by asset class**

## **2.14 Legislation compliance status**

Compliance with the MFMA implementation requirements have been substantially adhered to through the following activities:

### **2.14.1 Service Delivery and Implementation Plan**

A draft SDBIP is also submitted with the Budget Documentation. This will be finalized upon the approval of the 2024/2025 MTREF at least 30 days before the start of the next financial year directly aligned and informed by the 2024/2025 MTREF.

### **2.14.2 In year reporting**

Reporting to National Treasury in electronic format was fully complied with on a monthly basis. Section 71 reporting to the Executive Mayor (within 10 working days) has progressively improved and includes monthly published financial performance on the Municipality's website.

### **2.14.3 Internship program**

The Municipality is participating in the Municipal Financial Management Internship program. Currently there are no interns appointed, however the recruitment process is underway for the filling of the vacancies.

### **2.14.4 Budget and Treasury Office**

The Budget and Treasury Office has been established.

### **2.14.5 Audit Committee**

An Audit Committee has been established and is fully functional.

### **2.14.6 Annual Report**

Annual report is compiled in terms of the MFMA and National Treasury requirements.

### **2.14.7 MFMA Training**

MFMP Training took place in the 2023/2024 financial year, in collaboration with West Coast District Municipality.

## 2.14.8 Policies

Budget related policies has been reviewed and updated for final submission with the approval of the 2024/2025 MTREF & outer two years.

## 2.15 Other supporting documents
